

It should not be up to the National Association of Broadcasters to dictate what I am permitted to hear on XM satellite radio. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. XM radio is a wonderful advance in entertainment and communication, and further, it has the capability to enhance safety by way of severe weather forecasts. It is absurd that the NAB would seek to limit the advances that XM radio is providing.

John Quinn, MD
